Ancillary supplies: • Towel • Scissors • Razor • CPR mask • Gloves d. Before preparing and implementing any AED policy, ensure that is fully complies with the directions of your medical advisor, applicable laws, regulations, corporate policies and manufacturer's operating instructions. Sample AED Policy An automated external defibrillator (AED) is used to treat victims who experience sudden cardiac arrest (SCA). If your AED is beeping or not flashing green at any time, please contact the Emergency Services Department immediately at 214-561-1508. Do not move the AED to another location unless it's an emergency! Adult AED pads in sealed package Pediatric AED pads in sealed package Check expiration date on pad packages Barrier Mask Gloves EMT Scissors Razors Absorbent gauze or hand towels OTHER (specify) Refer to manufacturer's User's Manual for more information and proper annual maintenance procedures. AR 1.16-1 1/2004 An Automated External Defibrillator (AED) needs to be maintained properly in order to keep the device in good working order.. Ideally an AED should undergo monthly checks by a responsible person. Different models of defibrillator may require different checks, however the principles are the same. HC 735 (8-11) Daily AED and Crash Cart Checklist DAILY AED & CRASH CART CHECKLIST Zoll M Series Semi-Automatic Automatic External Defibrillator To be performed daily Monday-Friday at the start of each shift MONTH ____ YEAR ____ 1. Condition: Unit clean, no spills. Clear of objects on top, case intact. The LIFEPAK 500 AED is a semi-automatic defibrillator that uses a patented Shock Advisory System™. This software algorithm analyzes the patient's electrocardiographic (ECG) rhythm and indicates whether or not it detects a shockable rhythm. Check status indicator before placing AED back in service. Remove Data Card and overnight mail to TLTG Inc. Replace defibrillator Pads/Cartridge and any supplies used. Replace Data Card with spare. Push in tightly Review Post-Use procedures Monthly Inspection Perform all the above checks for daily, weekly and after use checks. An automated external defibrillator (AED) is a portable electronic device that automatically diagnoses the life-threatening cardiac arrhythmias of ventricular fibrillation and pulseless ventricular tachycardia, and is able to treat them through defibrillation, the application of electricity which stops the arrhythmia, allowing the heart to re-establish an effective rhythm. John Furst. JOHN FURST is an experienced emergency medical technician and qualified first aid and CPR instructor. John is passionate about

first aid and believes everyone should have the skills and confidence to take action in an emergency situation. Apr 11, 2019 (WiredRelease via COMTEX) -- Market.us adds a new market research report on "Global Automated External Defibrillator Market By Type (Semi-automated, and Fully automated), By ... Automated External Defibrillator (AED) Protocols. Description and Definition: Automated external defibrillators (AEDs) may be an important aspect to securing the health and safety of congregants, staff and visitors to the church. To incorporate AED protocols into a church, decisions need to be made regarding the number and AED Program. Act 35 of 2014 (which amends 24 P.S. § 14-1423) requires school entities to report to the Pennsylvania Department of Education (PDE) the number, condition, age and placement of automatic external defibrillators (AEDs) in each school. Model/Type Serial Number Location AED Weekly Inspection Record Check defibrillator for damage and general condition MNT DATE INITIALS Note use by date of adult electrode pads Note use by date of infant/child electrode pads if applicable Status indicator: Is the AED showing as rescue ready? Battery indicator if the AED has this feature Early Defibrillation Program . Policies and Procedures . The following document describes the policies and procedures to be used in governing an early defibrillation program. It is the goal of this program to provide a rapid response to sudden cardiac arrest for employees and guests. It is the intent of this document to give the For example, "install a public access defibrillator on the wall of our town hall." What is a public access defibrillator/AED? Explain what an AED does – there is plenty of information on this site to help you with this. Why do we need a public access defibrillator? Work with your local ambulance trust to obtain statistics on cardiac arrests. Automated External Defibrillator (AED) delivers this energy through disposable defibrillation electrodes applied to the patient's chest. Defibrillation is only one aspect of the medical care required to resuscitate a patient with a shockable ECG rhythm. Depending on the situation, other supportive measures may include: View and Download Medtronic Lifepak 500 operating instructions manual online. automated external defibrillator.
