The procedure gives general requirements to perform NDT inspections of structures made of monolithic CFRP carbon fiber reinforced plastic to look for accidental damage using compact systems. TESTIA, the Airbus Group's non-destructive testing and training subsidiary, has been involved in the product's industrialization for Airbus Customer Services. Airbus is developing a similar solution for 'classic' metallic airframes. Called the Clad Tool, this follow-on device is already applied internally in Airbus final assembly line ... Testia GmbH Testia GmbH was launched in October 2013 and is specialized in aerospace Non-Destructive Testing (NDT) services and training. Testia GmbH shares its headquarters with Airbus Operations in Bremen, and is the only company in Germany to offer the full spectrum of NDT services, training and expertise. Manual ultrasonic testing is one of the more common non-destructive testing methods performed on materials. This testing utilises high frequency mechanical energy, i.e. sound waves, to conduct examinations and measurements on a test area. Typically the UT inspection system consists of a transducer, pulser/receiver, and display unit. An NDT (Non-Destructive Testing) procedure for the Dolphicam ultrasound camera system has been made available for the Airbus A350 composite aircraft. The procedure gives general requirements to perform NDT inspections of structures made of monolithic CFRP – carbon fiber reinforced plastic – to look for accidental damage using compact systems. Applications of NDT Methods on Composite Structures in Aerospace Industry Ulf Schnars, Rudolf Henrich Airbus Hünefeldstraße 1-5 D-28199 Bremen, Germany Keywords Non-Destructive Testing, NDT, ultrasonic testing, composite inspection, shearography, thermography, laser ultrasound Abstract Non-Destructive Testing of Composite Materials in Aircraft Applications, ... For the Airbus A380 GLARE is used even for some shells of the upper fuselage. The weight percentage of composites in modern civil aircrafts like the A380 is in the ... The most applied NDT method is ultrasonic testing (manual as well as automatic, Ref.
