The first refers to an initial report of all research group (Binder, Tardu, Blackwelder, Feng and Maestri) who worked in the 90s on the subject of Pressure Fluctuation Interaction between ...0 - 9; Title Description Price Rating ; 2D Frame Analysis Dynamic Edition: This application uses a highly flexible, general, finite element method for static and dynamic analysis of multi span beams, 2D trusses and 2D frames. The following article will attempt to explain the basic theory of the frequency response function. This basic theory will then be used to calculate the frequency response function between two points on a structure using an accelerometer to measure the response and a force gauge hammer to measure the excitation.
