Antibiotics - The Perfect Storm We need new antibiotics to fight infections caused by resistant bacteria. But the marketplace, the structure of the pharmaceutical industry, regulatory agencies, and difficult science are conspiring to deny us the products we need. This blog will present perspectives and developments in the fight for new antibiotics. But in answer to resistance, our antibiotic pipeline is all but dry and the situation is deteriorating. The science of discovering new antibiotics is exceedingly challenging and the economics of antibiotics are becoming less and less favorable.

TheregulatoryagenciesliketheFDAarecontributingtotheproblemwithaconstantIn Antibiotics – The Perfect Storm, Dr. Shlaes explains how society has reached the desperate straights we are in, and describes what can be done to turn around the antibiotic crisis. His book offers a scathing, behind-the-scenes view into pharmaceutical companies and federal agencies which regulate them. Antibiotics, which actually cure disease, are only taken for days or weeks. In response to all these pressures, of the large pharmaceutical companies still extant, fewer and fewer are remaining active in antibiotic research.
