

Download Bedside Reporting Pocket Guide

With Smartheart it takes no more than 30 seconds to complete a full ECG process, a fraction of what it takes to complete the traditional process. By the time you hook up a patient to a traditional ECG device – you'll already have just sync it to your smartphone or tablet and you'll have a portable ECG right in your pocket.

Objectives. To explore how patient participation in nursing shift-to-shift bedside handover can be enacted. Use our innovative Time Out tools to help reduce surgical errors, improve patient outcomes, and raise awareness for National Time Out Day (June 15th, 2012).

Health information management, CDI, coding, and privacy news, analysis, and training for healthcare professionals responsible for ensuring electronic medical record, HIPAA, and Medicare compliance.
