Nezihe Merve Gürel Merve is a PhD student at DS3Lab with a research background in Information Theory. Currently, her research focuses on generalization of learning algorithms as well as building rigorous frameworks for efficient data acquisition, denoising and instrument calibration algorithms by incorporating computer systems aspects. Tor is free and open-source software for enabling anonymous communication. The name is derived from an acronym for the original software project name "The Onion Router". Tor directs Internet traffic through a free, worldwide, volunteer overlay network consisting of more than seven thousand relays to conceal a user's location and usage from anyone conducting network surveillance or traffic analysis. Jeppiaar Engineering College aims at the complete development of the student and our staff is hand-picked and trained to ensure that the students are given every possible support in all their pursuits, academic or personal.
