

Download Exchange Server 2010 Lab Manual

Microsoft Exchange Server 2010 introduced a new high availability feature called the Database Availability Group (DAG). This tutorial describes how Database Availability Groups work in Exchange Server 2010, as well as demonstrating the steps for deploying a DAG using Exchange Server 2010 SP1 and Windows Server 2008 R2. If you would like to read the next part in this article series please go to [Managing Relay connectors in Exchange Server 2007/2010 \(Part 2\)](#). I'm aware that this topic was brought up several times along the years, however, it is still a hot topic in many forums. This free script allows you to perform an Exchange Server 2016/2013/2010 server health check and automatically email the results in HTML format. I moved all of our users to Office 365. I have no AD sync running....so everything is separated. I now want to decommission the last exchange 2010 server. It is sitting idle, and is to be repurposed.
