Dawson Download By Peter E. Dawson - Functional ...Occlusion, in a dental context, means simply the contact between teeth. More technically, it is the relationship between the maxillary (upper) and mandibular (lower) teeth when they approach each other, as occurs during chewing or at rest. Static occlusion refers to contact between teeth when the jaw is closed and stationary, while dynamic occlusion refers to occlusal contacts made when the ...With the 4D dentistry concept, MODJAW introduces a new way of entering your patients' reality using true jaw motion and dynamic occlusion, in addition to 3D modeling. 4D dentistry is driven by the idea that both static and dynamic parameters should be taken into account to enable complete diagnostics and bespoke restorations. Adhering to smile design principles is essential when initiating the restoration of teeth in the anterior region of the mouth. When the dentist does not use smile design guidelines, there is no blueprint for tooth preparation and restoration.
