

Download Global Change And The Challenges Of Sustainably Feeding A Growing Planet

Sustainability is the process of maintaining change in a balanced environment, in which the exploitation of resources, the direction of investments, the orientation of technological development and institutional change are all in harmony and enhance both current and future potential to meet human needs and aspirations. For many in the field, sustainability is defined through the following ...4 INTRODUCTION In three short months between September and December 2015, world leaders made historic commitments to tackle the great challenges facing our planet, Your supper last night may have generated as many greenhouse gas emissions as driving to the next town in your car. At best, it was probably the equivalent of a couple of kilometres. The good news ...UN News produces daily news content in Arabic, Chinese, English, French, Kiswahili, Portuguese, Russian and Spanish, and weekly programmes in Hindi, Urdu and Bangla. Our multimedia service, through this new integrated single platform, updates throughout the day, in text, audio and video – also making use of quality images and other media from across the UN system.
