The S240 Tractor comes with a premium engine, the same as used in some Select Series™ X300 models: Large cleanout ports, integrated into the engine shroud, are located over the cylinder heads to allow for easy inspection and removal of any debris that may have collected there. An advantage of lawn tractors is their ability to use equipment for snow removal. Lawn tractor owners can add a John Deere snow blower or front blade to make quick work of moving snow whenever the need arises. Maintain your lawn mower optimal performance by replacing your old clogged fuel filter with the John Deere Fuel Filter for John Deere Mowers. John Deere incorporates precise-filtering media paper which prevents harmful debris from entering the engine.
