Smart meters are an upgrade to the energy system, allowing the UK to adopt a so-called 'smart grid'. It's expected that better information on energy use in homes and businesses should create a more efficient and reliable energy supply network which can plan to supply energy peaks at the right time. Find out how a smart meter can benefit you. Smart meters help you understand your energy use so you can lower your consumption and your bills. And there's more. The Government's smart meter roll-out is in peril as energy customers are so far failing to sign up. A Telegraph investigation reveals for the first time that less than half of households have ... It may seem strange why suppliers keep pushing smart meters even though customers can just say no. The reason for this is that suppliers have to tell the regulator Ofgem every year what they will achieve by the end of the year in terms of % of customers with a Smart Meter, and they must not miss this target.
