

Download Roadside Geology Of Minnesota Richard W Ojakangas

Richard W. Ojakangas grew up on glacial till in Warba, Minnesota. He received a bachelor's degree in geology from the University of Minnesota-Duluth and a doctorate from Stanford in 1964. He taught at the University of Minnesota-Duluth for thirty-eight years and is the author of numerous articles and other publications on geology, including Minnesota's Geology. Minnesota has lacked a Roadside Geology style book for too long. After years with Richard Ojakangas is a native Minnesotan whose life has been spent in learning about and teaching Minnesota's geological history. Overview. Roadside Geology of Minnesota steers you over glacial moraines and till plains to some of the state's unparalleled geologic features, such as the Morton Gneiss, once thought to be the oldest rock on Earth; the St. Peter Sandstone, one of the purest sandstones in the world; the banded iron-formation, the source of iron for... Roadside Geology of Minnesota by Richard W. Ojakangas. Learn about the Geology of Minnesota with maps, photos and expert descriptions!
