Don't let an acronym intimidate you. ITSM, or IT Service Management, is actually pretty simple. In fact, you've probably been a provider of ITSM services, in the form of an IT service desk. Operations management is an area of management concerned with designing and controlling the process of production and redesigning business operations in the production of goods or services. It involves the responsibility of ensuring that business operations are efficient in terms of using as few resources as needed and effective in terms of meeting customer requirements. Service Desk/Trouble Ticketing. The service desk is the single point of contact for IT Support, managing incidents and service requests, and handling communication with users. Automated ticket tracking, routing, and email notifications help resolve issues and requests efficiently, and self-service access for users helps them find answers to common problems quickly.
