The following are my suggestions for caring for your sheep. I am not a vet, or a scientist, or any kind of specialist – this information is based on my experience and research. Depending on breed, sheep show a range of heights and weights. Their rate of growth and mature weight is a heritable trait that is often selected for in breeding. Ewes typically weigh between 45 and 100 kilograms (100 and 220 lb), and rams between 45 and 160 kilograms (100 and 350 lb). When all deciduous teeth have erupted, the sheep has 20 teeth. ...Sheep is a very familiar domestic animal. Dry weather and cold area is very suitable for sheep farming. The main characteristics of sheep is that their body is fully covered with fur. Their skin and fur is very valuable. Sheep are not highly milk productive like goat. There are about 200 sheep breeds around the world.
