

Download Technical Guidance Manual For Sustainable Neighborhoods

The iSWM™ Program for Construction and Development is a cooperative initiative that assists cities and counties to achieve their goals of water quality protection, streambank protection, and flood mitigation, while also helping communities meet their construction and post-construction obligations under state stormwater permits. Find resources to help small towns and rural communities achieve their goals for growth and development while maintaining their distinctive rural character. Read about how EPA worked with local leaders to help them realize their community's vision for the future in our "Community Stories" story map ...Our technical staff are multi-cultural, dynamic individuals with deep roots and experience in the countries and communities where we work, and as a result have a strong desire to see our partnerships succeed. Preserving historic buildings is vital to understanding our nation's heritage. In addition, it is an environmentally responsible practice. By reusing existing buildings historic preservation is essentially a recycling program of 'historic' proportions.
