

Download Visionaire Oxygen Concentrator Manual

AirSep's VisionAire 5 Oxygen Concentrator is light, quiet and efficient making it an ideal concentrator for full time oxygen therapy users. With nearly silent operation, VisionAire 5 provides up to 5 LPM of continuous flow oxygen 24-hours a day, 365-days a year. VisionAire is compact, easy to use, and virtually maintenance free so it's easy to accommodate in your home. Airsep Focus can be operated from three different power sources - AC power, DC power and rechargeable batteries, allowing you to go practically anywhere. Equipped with a Velcro belt and shoulder strap, the Focus Oxygen Concentrator can be easily carried in the manner that meets your preference. The Inogen One G3 and the Lifechoice Activox by Inova Labs are two more portable oxygen concentrators in the more lightweight category. Since they are a little bigger than the models previously mentioned, they are capable of having a higher oxygen output. Home oxygen concentrators are solely intended for use inside the home and are not designed to be fully mobile. Home concentrator machines provide oxygen therapy patients with a quiet, durable and reliable source of medical grade oxygen in the comfort of their own home.
