

# Download Websphere Application Server V7 Administration And Configuration Guide

2 WebSphere Application Server V7: Session Management HTTP session management In many Web applications, users collect data dynamically as they move through the site based on a series of selections on pages they visit. Find out how IBM WebSphere Application Server helps you create, connect and optimize applications for any environment, whether on premises or on a public, private or hybrid cloud. WebSphere Application Server (WAS) is a software product that performs the role of a web application server. More specifically, it is a software framework and middleware that hosts Java-based web applications. It is the flagship product within IBM's WebSphere software suite. It was initially created by Donald F. Ferguson, who later became CTO of Software for Dell.

#### 4 WebSphere Application Server V7: Accessing Databases Data source support

The primary data source support is intended for J2EE 1.3 and J2EE 1.4, and Java EE 5 applications. Connection pooling is provided by two components, a
