

# Download Zumdahl Chemistry 8th Edition Solutions Manual Free

In chemistry, an ionic compound is a chemical compound composed of ions held together by electrostatic forces termed ionic bonding. The compound is neutral overall, but consists of positively charged ions called cations and negatively charged ions called anions. These can be simple ions such as the sodium ( $\text{Na}^+$ ) and chloride ( $\text{Cl}^-$ ) in sodium chloride, or polyatomic species such as the ammonium ...
